5. *Eccl.* A rite administered to baptized persons in various Christian Churches; formerly called 'bishoping'.

In the Roman and Greek Churches, always reckoned one of the seven sacraments, and in these and in the Church of England held to convey or be the vehicle of special grace which 'confirms' or strengthens the recipient for the practice of the Christian faith.

Down to the 13th c. confirmation was administered immediately or soon after baptism (as still in the Greek Church); since that time, it has been usually deferred in the Western Churches till the 'years of discretion'. In the Church of England and some other Reformed Churches, candidates are required publicly and personally to renew, ratify, and 'confirm' their baptismal vows (see CONFIRM *v.* 2, quot. 1552), and are then admitted to the full privileges of the Church.

confuse (kən'fju:z), *v.* [A passive pple. *confused* is found from 14th c.; but the present stem and active voice are only of modern use, having been formerly expressed by CONFOUND: cf. F. *confondre*, *confus*, L. *confundĕre*, *confūsus*. The vb. is entered by Bailey (folio) 1730-6, and thence by Johnson, but there are no examples, exc. of the pa. pple., in J., Todd, or Richardson. The pple. was thus evidently an English adaptation of F. *confus* or L. *confus-us*, with the native ppl. ending -ED, and the present stem a much later inference from it.

Hence, it may be said that *confound* had formerly 3 pa. pples., *confuse*, *confused*, *confounded*; the first two only passive, the last used also in forming the perfect active: of these *confuse* became at last solely an adjective; *confused* has given origin to a separate verb, *confuse*, of which it is now the pa. pple.; *confounded* remains the sole pa. pple. of *confound*.]

†**'congeon, 'conjon.** *Obs.* Forms: 3 ? cangun, 4 kongon, conjoun, -ioun, -gioun, 5 conion(e, coonyone, counjon, congyn, 5– congeon. [The phonology and final stress in verse show this word to be of French origin. In all probability *cangun* in the earliest quot. is the same word, and stands for *cangiun* or *canjun* (*g* for *j* being not infrequent in ME., cf. the form *kongon*), repr. an ONF. **cangiun*, *cangeon*:—late L. *cambio*, *cambiōnem* (cited in Grimm *Deut. IV, 1754, and thence in Henschell's Du Cange), a CHANGELING (Ger. *wechselbalg* a child of an incubus, demon, or hag, substituted for a human child) f. *cambīre* to change.

The ME. forms have suffered at the hands of bad copyists and editors, who have turned *conjon* into *coujon*, *conioun* (= *conjoun*) into *coinoun*, with other blundered spellings. A derivation from *cambio* fits the sense, for changelings were popularly held to grow up dwarfs or deformed in body (cf. sense 1), and deficient in intellect sense 2), and to be called one was a grievous insult (senses 3, 4). The difficulties are (1) the apparent rarity of the word in Fr., where the only instance yet cited is one of 1427 in Du Cange, repeated by Godefroy, under the form *changon* 'terme injurieux', which is app. the central F. form, standing for *changeon*, *chanjon*; (2) the AFr. or early ME. change of *can-* to *con-*; this took place before the retraction of the stress from the final syllable, and may have been owing to association with the prefix *con-*.]

To Kersey is due the statement (or suggestion) that the word was originally *congress* or F. *congrès*, subsequently treated as a plural, with singular *conger*. But it is to be noted that in most of the quots. *conger* is applied to the association, not to a member of it. Bailey refers it tentatively to *conger* the fish, which may indicate a contemporary joke.

(The intention of the Act of 1854 was to enlarge the constitution and powers of the 'Ancient House of Congregation': it was held however by the legists that, instead of doing so, it had created a new body, 'the Congregation of the University', leaving the 'Ancient House' intact. There are therefore now *two* Congregations in the University.)

5. In English versions of the Bible, applied in the O.T. to the collective body of the Israelites in the wilderness, and to a public solemn assembly of the people or nation: so *congregation of the Lord*, etc.

Here it is put for two distinct Heb. words *ʿēdāh* and *qāhāl*, the original difference between which was app. that *ʿēdāh* meant the collective body or community, and *qāhāl* an actual assembly that had met and would disperse again; but in application the two were necessarily often identical; the assembly consisted of or represented the community. By the LXX *ʿēdāh* is, with rare exceptions, rendered *συναγωγή*; *qāhāl* is rendered 70 times *ἐκκλησία*, 37 times *συναγωγή*, 10 times by *ὄχλος* or other word. The Vulgate has for both words a great variety of renderings, e.g. *multitudo, cœtus, populus, turba, congregatio* for both; also *plebs, vulgus, globus, caterva, synagoga* for *ʿēdāh*; *concio, ecclesia, exercitus* for *qāhāl* . Wyclif has *congregacioun* only in the few places in which *congregatio* appears in the Vulgate; but in the 16th c. versions, *congregation* became the predominant rendering of both words; in the 1611 version it occurs 124 times for *ʿēdāh*, 86 times for *qāhāl*. In a relatively small number of cases, both words are rendered *company*, and *assembly*.) The Revised Version of 1885 has distinguished *ʿēdāh* and *qāhāl* in the Heptateuch as *congregation* and *assembly*, but elsewhere has usually continued the indiscriminate use of 'congregation' found in the earlier version.

†6. Used by Tindale to translate *ἐκκλησία* in the N.T., and much used by the Eng. Reformers of the 16th c. instead of CHURCH (on account of the current restriction of the latter term to the clergy or clerical order):

5. *Theol.* **a.** (*Doctrine of Merit.*) With the Schoolmen, the condition of its being 'congruous' that God should confer the 'first grace' in response, and in 'a certain equality of proportion', to the performance of good works by man. Opposed to CONDIGNITY.

Representing L. *congruitas*, used by Aquinas in stating that while 'condignity' can be attributed to meritorious works only as they proceed from the grace of the Holy Spirit, it yet 'seems *congruous* that a man, working according to his own virtue or power, should be recompensed by God according to the excellency of His virtue.' *Summa Theol.* Prim. Sec. Q. cxiv, Art. iii. Hence the expressions *meritum ex congruo*, *meritum congrui* 'merit (arising) out of congruity', 'merit of congruity'; *mereri* (*gratiam*, etc.) *de congruo* 'to merit (grace, etc.) from or of congruity'. (Some late writers have apparently confused the last with the 'congruity of efficient grace' in b.).

H. Newman *Tract* xc. §3 To deserve *de congruo* or of congruity, is to move the divine regard, not from any claim upon it, but from a certain fitness or suitableness: as for instance it might be said that dry wood had a certain disposition of fitness towards heat which green wood had not. **1856** Bp. H. Browne *On 39 Articles* Art. x, It being agreeable to His nature and goodness to bestow grace on those who make such [unassisted] efforts. Endeavours then on the part of

man to attain to godliness were by the schoolmen said to deserve grace *de congruo, of congruity*.

b. (*Doctrine of Grace.*) The suitability or adaptation of divine grace to the character, nature, disposition, or other circumstances of the person called, to which some theologians attribute its efficacy (see CONGRUISM); 'the efficacy of grace which acts while at the same time preserving the action of the free will' (Littré). A term belonging to the great controversy on Grace between the Dominicans and the Jesuits, which began c. 1580.

H. BROWNING *Bacteriology* iv. 67 The higher bacteria, like the fungi, develop special structures known as 'conidia', and these conidia then grow into the bacterial forms. **1934** A. T. HENRICI *Biol. Bacteria* vi. 99 The Actinomycetes proper multiply by means of spores, or *conidia*, which, like the conidia of Fungi belonging to the Ascomycetes or Fungi imperfecti, are formed by a constriction of cells at the ends of filaments of the mycelium projecting into the air... Apparently, then, these Actinomycetes are just like molds in their essential characters, and indeed some authorities would classify them with the higher Fungi rather than with the bacteria. **1960** C. F. ROBINOW in Gunsalus & Stanier *Bacteria* I. v. 229 Although this chapter is supposedly dealing with the *endospore* of bacteria, we may, in truth, be concerned with something which may have to be regarded as a cross between a conidium and a chlamydospore. **1969** S. T. LYLES *Biol. Microorganisms* viii. 174 Actinomycetes produce true mycelia, which may contain irregular segments and branches; conidia may be produced. Although not true bacteria, these procaryotic fungilike forms differ from true fungi in many respects and are still grouped with bacteria.
Hence **co'nidial** *a.*, of, or pertaining to, of the nature of or relating to a conidium or conidia. **conidi'iferous** *a.* [L. *-fer* bearing + -OUS], **conidi'ophorous** *a.* [Gr. -φορος bearing + -OUS], bearing conidia. **co'nidioid** *a.*, of the form or character of a conidium. **co'nidiophore**, a stalk or branch of the mycelium bearing conidia.

Formerly, two planets were said to be *in conjunction* when they were in the same sign of the zodiac, or even in adjacent signs; in modern astronomy, the term is definitely restricted to their position at the moment when they are in the same longitude or right ascension. *Conjunction* is often used simply for *conjunction with the sun* of a primary planet (formerly also of the moon, in which case it is equivalent to 'new moon'). An inferior planet may be in *inferior conjunction*, i.e. between the earth and the sun, or in *superior conjunction*, i.e. on the farther side of the sun.

F. *connexion* (14th c. Oresme), Pr. *connexio*, Sp. *conexion*, Pg. *connexão*, It. *connessione*. The etymological spelling *connexion* is the original in Eng.; in 17th c. it was supported by the verb CONNEX; after the latter was displaced by CONNECT, the sb. began *c* 1725–50 to be often spelt *connection*, a spelling which, under the influence of etymologically-formed words, such as *affection*, *collection*, *direction*, *inspection* (all f. L. ppl. stems in *-ect-*), is now very frequent.

The earlier Eng. lexicographers, including Bailey, Johnson, Walker, Todd, Crabb, recognize *connexion* only. *Connection* appears in Webster (1828) who says 'For the sake of regular analogy, I have inserted *Connection* as the derivative of the English *connect*, and would discard *connexion*'. This preference has been followed by other dictionaries in U.S. Latham would differentiate the two spellings and use *connexion* only in senses 5–8. *Connexion* is the official and invariable spelling in sense 8, and was used in all senses by the majority of writers (or printers) in England until the mid-20th c., when *connection* became more ususal.]

2. *Logic. connotative term*: according to J. S. Mill, a term or word which, while it denotes (or is predicated of) a subject, also connotes or indicates its attributes.

In the scholastic and later logic a connotative, as distinguished from an absolute, term was one which primarily signified an attribute and secondarily a subject. In the logic of J. S. Mill this usage is inverted; the subject is 'denoted', the attribute 'connoted'. Later still, the terms 'denotation' and 'connotation' have been used in a sense synonymous with logical 'extension' and 'intension' (cf. quot. 1876 in CONNOTATION 2, and Fowler *Deduct. Logic* ii. (1887) 19).

1829 JAS. MILL *Hum. Mind* (1878) I. ix. 306 *Friend* is a concrete, connotative term.. Its connotation is dropped by another mark, the syllable *-ship*; thus *friendship*. **1846** J. S. The Latin word was in common use in mediæval logic: app. first, according to Prantl, in Duns Scotus, and frequently in Occam, and so onwards in the terminology of the schools; thence it passed into English literary use; but its use as an English technical term of logic is recent, and due to Jas. and J. S. Mill.

2. Of things or facts: To imply or involve as a consequence, condition, or accompaniment.

4. *Logic.* (Of a term.) †**a.** With the earlier logicians: To imply or indicate the subject in which an attribute inheres, while primarily signifying or 'noting' the attribute itself. *Obs.* **b.** With J. S. Mill: To imply or indicate the attributes involved, while denoting (or being predicated of) the subject.

As to the change of use, see note to *connotative term*, and cf. quot. 1829 with Heerebord above.

1829 JAS. MILL *Hum. Mind* (1878) I. i. §5. 34 *note*, White, in the phrase white horse, denotes two things, the colour and the horse; but it denotes the colour primarily, the horse secondarily. We shall find it very convenient to say.. that it *notes* the primary, *connotes* the secondary signification. **1846** J. S. MILL *Logic* I. ii. §5 The word white, denotes all white things, as snow, paper, the foam of the sea, etc., and implies, or as it was termed by the schoolmen, *connotes*, the attribute of whiteness. *Ibid.*, The name.. is said to signify the subjects *directly*, the attributes *indirectly*; it *denotes* the subjects, and implies, or involves, or indicates, or as we shall say henceforth, *connotes*, the attributes. It is a connotative name. *Ibid.*, Whenever the names given to objects convey any information, that is, whenever they have properly any meaning, the meaning resides not in what they *denote*, but in what they *connote*. **1887** FOWLER *Deduct. Logic* ii. 19 A term may be said to *denote* or designate individuals, to *connote* or mean attributes or groups of attributes.

c. Hence, in general, non-technical use: To imply, include in its signification, convey to the mind or mean in actual use and application. (Often loosely used.)

First treated of by Prof. J. Wallis of Oxford in 1662. In his definition the name is applied to one quarter of the whole solid, formed by two sections, parallel and at right angles, respectively, to the edge, and having thus one fourth of the curved surface, and three plane surfaces, one a quadrant of the circular base.

b. Used as a distinctive surname or title of victorious princes; *esp.* in *Eng Hist.* of William I, often referred to familiarly as 'the Conqueror'.

So far as English or Anglo Fr. evidence goes, there appears no reason to think that as applied to William I, this term or its corresponding med.L. *conquæstor*, *conquestor*, *conquisitor* (see CONQUESTOR) meant anything else than 'conqueror' in sense 1, = *domitor* or *expugnator Anglorum*, *triumphator Angliæ* of the contemporary chroniclers. The notion that *conquestor* had here only the sense of 'acquirer' or 'purchaser' as distinguished from 'inheritor' (see sense 2, and CONQUEST 5, in Scotch Law), appears to have been first started by Spelman (or his posthumous editors), whence it was taken by Blackstone and later writers. The historical evidence as to the use of the word shows that the appellation *Conqueror*, *Conquæstor* was applied to William the Great, just as to Alexander the Great, to Charles the Great, to Jayme I of Arragon (*el Conquistador*), etc.

conquest ('kɒŋkwɛst), *sb.* Also 3–5 conqueste. [Represents two OF. words: (1) *conquest* (now *conquêt*) m.:—L. type **conquæstum* (cf. Pr. *conquist*, It. *conquisto*), med.L. *conquestum, -quistum*, for L. *conquisītum*, neuter of pa. pple. of *conquīrĕre* (see CONQUER); (2) OF. *conqueste* (now *conquête*) fem. = Pr. *conquesta*, Sp., It.; med.L. *conquesta, -quista*, fem. sb. from the pa. pple. (parallel to sbs. in *-ata, -ade, -ée*). The latter of these expressed the action, the former the proceeds of acquiring or conquering. Cf. *acquest*, OF. *aquest*, but *inquest, request*, OF. *enqueste, requeste. Conquêt, conquête* are still distinct in F., but in Eng., through loss of final *-e* and of grammatical gender, the two forms ran together at an early date.

The original sense in med.L. and F. was 'acquisition, esp. as the result of effort'; including getting by force of arms as well as by other means. Hence two lines of development: first, with the feudal jurists 'personal acquisition of estate, as opposed to inheritance', without specific reference to the mode, whether by force of arms, by grant, or (in later times) by money, called PURCHASE in English Law; secondly, 'acquisition by force of arms, military conquest'. The latter of these is by far the earlier in English, and has always been (with its transferred uses) the only popular sense. The general sense of acquisition and esp. the legal sense as opposed to inheritance, is chiefly Scotch and prominent in Scotch law.]

conscience ('kɒnʃəns). Forms: 3– conscience, 3–6 concience, 4–6 conciens, -cyens, -sience, -syence, -syens, -sciens, -scyence, (5 consions, 6 concyence, conchons, consyenes, sconscyence, 7 contience). [a. F. *conscience* (*cunscience*) 12th c. (= Pr. *consciencia*, *cossiencia*, Sp. *conciencia*, It. *coscienza*), ad. L. *conscientia* privity of knowledge (with another), knowledge within oneself, consciousness, conscience, f. *conscient-* pr. pple. of *conscīre*, f. *con-* together + *scīre* to know; thus *conscīre alii* to know along with another, to be privy with another to a matter, thence, *conscīre sibi* to know with oneself only, to know within one's own mind.

In ME. *conscience* took the place of the earlier term INWIT in all its senses; cf. OHG. *giwizza*, Ger. *gewissen*, conscience. The word is etymologically, as its form shows, a noun of condition or function, like *science*, *prescience*, *intelligence*, *prudence*, etc., and as such originally had no plural: a man or a people had *more* or *less* conscience. But in sense 4 it came gradually to be thought of as an individual entity, a member or organ of the mental system, of which each man possessed *one*, and thus it took *a* and *plural*. So *my conscience*, *your conscience*, was understood to mean no longer our respective shares or amounts of the common quality *conscience*, but to be two distinct individual *consciences*, mine and yours. Where the word has continued to be used without the article, as in 'the dictates of conscience', orig. parallel to 'the dictates of prudence' or 'of common sense', the prevalent tendency is to personify Conscience as 'this Deity in my bosom'. In the 15–16th c., the word appears to have been often, by reason of its final *s* sound, associated with plurals like *wits*, *brains*, *bowels*, as *patience* is still in dialects. Cf. the illiterate spellings *consions*, *conchons*, etc.: hence apparently *canscion-* in CONSCIONABLE, CONSCIONED, CONSCIONLESS.]

II. Consciousness of right and wrong; moral sense.

4. a. The internal acknowledgement or recognition of the moral quality of one's motives and actions; the sense of right and wrong as regards things for which one is responsible; the faculty or principle which pronounces upon the moral quality of one's actions or motives, approving the right and condemning the wrong.

Opinions as to the nature, function, and authority of conscience are widely divergent, varying from the conception of the mere exercise of the ordinary judgement on moral questions, to that of an infallible guide of conduct, a sort of deity within us. Popularly, the word is often used for the whole moral nature; for its gradual individualizing and personification in this sense, see note in etymology.

Hence it has become a general term for methods of compulsory enlistment; but, technically, as distinguished from universal military service, it implies the enrolment by lot of a fixed number of those liable to service, with the option given of procuring a substitute.

2. a. The most common current designation of one of the two great English political parties, the characteristic principle of which is the maintenance of existing institutions political and ecclesiastical. (*With capital C.*)

The word was first used in this sense by J. Wilson Croker in an article published on 1 Jan. 1830; and almost immediately largely took the place of the term Tory (originally reproachful), which had been in use for nearly 150 years. (Measures tending to preserve cherished political conditions had before this been sometimes spoken of as *conservatory*.) Preference for 'Conservative' sometimes implied disavowal of the reactionary tendencies which had sometimes been associated with earlier Toryism, and espousal of the new phase introduced by Sir R. Peel; and the name was not at first received with favour by all Tories, any more than it was admitted to be properly descriptive by their political oponents. Hence many early references ridicule the word.

4. The taking into account of anything as a motive or reason; a fact or circumstance taken, or to be taken, into account; a reason considered.

This sense ranges indefinitely between the process of considering and the fact or matter considered, without being quite identified with either: cf. REASON. Thus 'these considerations lead me' = the consideration of these facts, or these facts being considered, lead me; 'I put before you these considerations' = facts to be considered.

c **1460** Fortescue *Abs. & Lim. 6. *Law.* Anything regarded as recompense or equivalent for what one does or undertakes for another's benefit; especially, in the law of contracts, 'the thing given or done by the promisee in exchange for the promise' (Langdell 1880 §45). It may itself be a promise. No promise is enforceable without consideration, unless made by deed.

At its first appearance (see quot. 1530) it is hardly a technical term, or distinguishable from *motive*; it gradually acquired its precise technical meaning in the course of the 17–18th c. Natural affection was formerly called *good consideration*, as contrasted with *valuable* c., or that which is deemed to have value in a pecuniary sense: the distinction is now only of historical interest.

1. An alphabetic or phonetic element other than a vowel; an elementary sound of speech which in the formation of a syllable is combined with a vowel. Applied both to the sounds and to the letters (the latter being the historically prior use).

While a vowel sound is formed in the larynx, and only receives its special quality by the conformation of the oral cavity through which it is sounded, a consonant sound is wholly or mainly produced in the mouth, or the mouth and

nose. Vowels thus consist of pure voice or musical sound; consonants are either simple noises or noises combined in various degrees with voice. But a noise may itself be of a continuous and rhythmical character, as a friction, trill, hiss, or buzz, and those consonants in which this is markedly the case approach closely to vowels, and may perform the function of a vowel in a syllable. Hence 'the boundary between vowel and consonant, like that between the different kingdoms of nature, cannot be drawn with absolute definiteness, and there are sounds which may belong to either' (SWEET *Handbk. Phonetics* §164). And there is in the consonants a regular gradation from those which come nearest to vowels and may function as vowels, to those which are most remote, and never so function. From this point of view, elementary sounds have been classed as (1) vowels, (2) semi-vowels (Eng. j and w), (3) liquids (l, ʎ, r), (4) nasals (m, n, ɲ, ŋ), (5) fricatives or spirants, *voice* (v, ð, z, ʒ, ɣ), and *breath* (f, θ, s, ʃ, x), (6) mutes or stops, *voice* (b, d, g), and *breath* (p, t, k). Class 2 are more strictly the vowels *i*, *u*, functioning as consonants, and classed as consonants; classes 3, 4, 5, are capable, in a decreasing measure, of functioning as vowels; only class 6 have the consonantal function exclusively, *p*, *t*, *k*, being the most typical consonants. The use of the liquids and nasals as vowels or sonants is a prominent feature in Indogermanic Phonology. (See VOWEL.) Consonants may also be classed, according to the part of the mouth where they are formed, into labials (p, b, f, v, m, w), dentals, palatals, gutturals, and other minor groups. (See these terms.) In the Roman alphabet (with its Greek accessions), the historical vowels are *a*, *e*, *i*, *o*, *u*, *y*; down to the 16–17th c., *i* and *u* were used both as vowels and consonants, a double function served by *y* and *w* in various modern languages.

consort (kən'sɔ:t), *v.* [Found first in end of 16th c. The origin and early history are obscure and complicated. It is possible that the different senses had two or even three different origins. Thus, branch I was app. formed on CONSORT *sb.*[1], with the notion of 'act as a consort to'. Branch II cannot be separated from a simple verb SORT, very common from *c* 1570 onwards in all the senses 3–6 below. In sense 3 there was obviously sometimes association with L. *sors*, *sortem*, F. *sort* lot, fate, destiny. Branch III is intimately associated with CONSORT *sb.*[2], branch II. But even if thus originally distinct, the senses appear to have been considered as belonging to one word, and to have mutually influenced each other, for some uses combine the different ideas: cf. 4, 5, with 1; 7 with 3, 5, 6. Cf. also obs. It. *consortare* 'to consort together' (Florio, 1611), f. *consorte* mate, consort. There were also med.L. vbs. *consortare*, *-ari*, to lie adjacent, have common boundaries. A herb to which healing virtues were attributed; the plant so called by the Romans is generally supposed to have been the comfrey (*Symphytum officinale*). The name *Solidago* was a mediæval synonym of *Consolida*, whence 'Consound' has also aometimes been erroneously used as a book-name of species of the composite genus to which *Solidago* is now applied, or of *Senecio* confounded with it.

Other med.L. forms were *comestabilis*, *conestabilis*, etc.: see Du Cange. The early development of the sense, whereby the *comes stabuli*, from being the head groom of the stable, became the principal officer of the household of the Frankish kings, and of the great feudatories, and the field-marshal or commander-general of the army, had taken place before the word came into English; the development was parallel to that of *marshal*. The earlier English uses were simply taken over from French.]

2. *spec.* **a.** ***Constable of France***: the principal officer of the household of the early French kings, who ultimately rose to be commander-in-chief of the army in the absence of the monarch; he was the supreme judge of military offences and of questions of chivalry, and had the regulation of all matters connected with tilts, tournaments, trials by combat, etc.

The office was abolished in 1627; the title was revived by Napoleon I, but discontinued on his overthrow. An officer bearing the name of constable existed also in the households of the great feudal lords of France.

b. ***Constable of England, Lord High Constable***: one of the chief functionaries in the English royal household, with duties and powers similar to those of the same officer in France.

Together with the Earl Marshal, he was the judge of the Court of Chivalry, and in early times his powers of jurisdiction were extensive. The office, which had been made merely titular a few years before, was forfeited by Edward Stafford, duke of Buckingham, in 1521; since which time the title has been granted only temporarily for particular occasions, esp. the sovereign's coronation. Thus the Duke of Wellington was Lord High Constable at the coronation of Queen Victoria.

b. ***High Constable***: an officer of a hundred or other large administrative district, appointed to act as conservator of the peace within his district, and to perform various other duties. (Abolished in 1869.)

The office seems to have been originally established for military purposes, to raise the military force of the hundred in case of war or civil commotion; the duties attached to the office became in the course of time more of an administrative character.

7. The system or body of fundamental principles according to which a nation, state, or body politic is constituted and governed.

This may be embodied in successive concessions on the part of the sovereign power, implied in long accepted statutes, or established gradually by precedent, as in the British Constitution; or it may be formally set forth in a document framed and adopted on a particular occasion by the various orders or members of the commonwealth, or their representatives, as in the Constitution of the United States, the various Constitutions of France after 1790, and those of other nations, framed in imitation of these. In the case of a *written Constitution*, the name is sometimes applied to the document embodying it. In either case it is assumed or specifically provided that the *constitution* is more fundamental than any particular law, and contains the principles with which all legislation must be in harmony.

This sense gradually arose out of the prec. between 1689 and 1789: see the early quots.

b. *Dynamics.* See CONSTRAIN *v.* 1 e.

A body has in the most general case six degrees or freedom, viz. three of translation and three of rotation; if there is a hindrance to one or more of these, the motion of the body is so far constrained; hence, ***degrees of constraint.*** Thus if one point in the body is fixed, it cannot have motion of translation, but has all the degrees of rotation: if two points are fixed, its only motion can be that of rotation about an axis passing through these two points; it has thus one degree of freedom, and five degrees of constraint: a sphere moving between two parallel tangent planes has only one degree of constraint; a cube under the same conditions has three. ***kinetic constraint***: the condition that a body shall move subject to certain relations: e.g. that a body shall roll on a plane. ***principle of least constraint***: the theorem enunciated by Gauss in 1829, that when there are connexions between parts of a system, the motion is such as to make the sum of the constraints a minimum.

2. *adj.* in *construct state*, *state construct*, in grammar of Hebrew and other Semitic languages: the form of the substantive used when standing before another having an attributive (or genitive) relation to it, which may be translated by the nominative (or other case) followed by *of*, as '*bayith* house, *bēyth-ĕlō'hīm* house of God.

It is distinctive of the Semitic languages that in expressing such a notion as *house of God*, they do not, like the Aryan languages, put *God* in the genitive, but, retaining this unchanged, put *house* in the 'state construct'. In this form the substantive becomes accentually combined with that which follows, losing its independent stress, and undergoing various consequent changes, as loss or lightening of vowels, of inflexional consonants, etc.

1938 A. CHURCH in *Bull. Amer. Math. Soc.* XLIV. 224 The existence of at least a vague distinction between what I shall call the constructive and the non-constructive ordinals of the second number class, that is, between the ordinals which can in some sense be built up step by step from below and those for which this cannot be done.., is, I believe, somewhat generally recognized. **1943** *Trans. Amer. Math. Soc.* LIII. 41 It appears that there is a proposition provable classically for which no constructive proof is possible. **1965** [see INTUITIONISM 3]. **1972** M. KLINE *Math. Thought* li. 1203 The definition of a prime number is constructive, for it can be applied to determine in a finite number of steps whether a number is prime. READ *Art Now* 110 We are in a world of inorganic, of mechanic, sensibility. If there is an undertone it is an undertone of the machine: the dynamo, the rock-drill, the hydraulic pump. Because of this relation, this aspect of cubism is sometimes given a special label: Constructivism. **1948** —— *Philos. Mod. Art* (1952) xii. 217 Naum Gabo..was..one of the founders of the abstract movement in Moscow known as Constructivism. **1948** *Archit. ASHTON in A. Pryce-Jones *New Outl. Mod. Knowl.* 312 The Cubists and the Futurists were controlled too much by technique, and this led to a still further emanation of technology usually referred to as the Constructivist school. **1961** *Times* 23 Jan. 16/1 English constructivists love white.

2. Of or pertaining to, an adherent of, mathematical constructivism (see CONSTRUCTIVISM 2.

The proper F. repr. of L. *consummāre* is *consommer* (14th c. in Littré), but this was often spelt after its L. original, *consummer*, and by consonant-simplification *consumer*. It was thus brought into association with L. *consūmĕre*; the senses of the two verbs came also into contact in the notion 'finish, constructively or destructively', and during 15–16th c. both were entirely merged in the forms *consommer, consummer, consumer*. Subsequently they have been partly differentiated; but *consommer* with its derivatives *consommation*, etc. still retains the sense of 'consume victuals', which belongs etymologically to *consumer*. Cf. CONSUMATION. In English, the confusion, which we originally received from Fr., was rectified at the Revival of Learning in the 16th c.]

contemplate ('kɒntəmpleɪt, kən'tɛmpleɪt), *v.* [f. L. *contemplāt-* ppl. stem of *contemplāre, -ārī*: see CONTEMPLE.

In a few rare cases (Shaks., *Hudibras*) stressed '*contemplate* in 16-17th c.; also by Kenrick 1773, Webster 1828, among writers on pronunciation. Byron, Shelley, and Tennyson have both modes, but the orthoepists generally have *con'template* down to third quarter of 19th c.; since that time *'contemplate* has more and more prevailed, and *con'template* begins to have a flavour of age. This is the common tendency with all verbs in *-ate*. Of these, the antepenult stress is historical in all words in which the penult represents a short Latin syllable, as *ac'celerate, 'animate, 'fascinate, 'machinate, 'militate*, or one prosodically short or long, as in *'celebrate, 'consecrate, 'emigrate*; regularly also when the penult has a vowel long in Latin, as *'alienate, 'aspirate, con'catenate, 'denudate, e'laborate, 'indurate, 'personate, 'ruinate* (L. *aliēno, aspīro*, etc.). But where the penult has two or three consonants giving positional length, the stress has historically been on the penult, and its shift to the antepenult is recent or still in progress, as in *acervate, adumbrate, alternate, compensate, concentrate, condensate, confiscate, conquassate, constellate, demonstrate, decussate, desiccate, enervate, exacerbate, exculpate, illustrate, inculcate, objurgate*, etc., all familiar with penult stress to middle-aged men. The influence of the noun of action in *-ation* is a factor in the change; thus the analogy of *,conse'cration, 'consecrate*, etc., suggests *,demon'stration, 'demonstrate.* But there being no *remonstration* in use, *re'monstrate*, supported by *re'monstrance*, keeps the earlier stress.]

contemporary (kən'tɛmpərərɪ), *a.* and *sb.* Also *β.* 7–9 co-temporary, cotemporary. [ad. L. type **contemporāri-us*, f. *con-* together + *tempus, tempor-* time, *temporārius* of or belonging to time; the actual formations in L. were *contemporālis* and *contemporāneus* (see above).

Contemporary is the original form, and that approved by Latin analogies; cf. the preceding and following words. But the variant *co-temporary* was used by some in the 17th c., and though characterized by Bentley as 'a downright barbarism', it became so prevalent after *c* 1725, as almost to expel *contemporary* from use. Towards the end of the 18th c., the latter rapidly recovered its ground, and *cotemporary* is now used by comparatively few. It has been defended on the ground that it is a purely English formation, like *co-divine, co-glorious* (see CO- 2); but this is a mere fancy generated by mechanically dividing the word, without regard either to its history or to its meaning. Historically, *contemporary* is a substitute for *contemporal* and *contemporane* (either of which might well have been retained instead); in signification, *co-temporary* would analogically mean 'unitedly, conjointly, or equally temporary', whereas *contemporary* has no affinity with the English sense of 'temporary', and no connexion with that word except that both are derivatives of L. *tempus* and its adj. *temporārius*.]
